DECREE

This case came on to be further heard at this term, additional proof being submitted, and the cause further argued by counsel, and thereupon, upon consideration thereof, it is ORDERED, ADJUDGED AND DECREED as follows, viz:

I.

1. That the Bear River is an inter-state stream with a large number of tributaries in the States of Utah, Wyoming and Idaho, said river rising in the Wasatch mountains in northeastern Utah and flowing in a general northerly direction through the States of Utah and Wyoming to a point on the boundary line between the States of Idaho and Wyoming near the town of Border in the State of Wyoming, into the State of Idaho, thence in a general northwesterly direction around the north end of Bear Lake (including North or Mud Lake) located in Bear Lake County, Idaho, and Rich County, Utah, to a point near the town of Alexander in said State of Idaho, thence in a general southerly direction through the States of Idaho and Utah, emptying into Great Salt Lake in said latter state.

That there is hereby drawn within the jurisdiction of this court, for distribution for beneficial uses, under and pursuant to the terms of this decree, all that portion of Bear River, as above described, commencing at a point directly north of Bear Lake in Section 34, Township 13 South, Range 44 East, Boise Meridian, which said point is marked and indicated by the "Stewart Dam," and headgates to the plaintiff's intake canal into Bear Lake Reservoir, known as the "Rainbow Canal," thence generally northwesterly through Idaho, to a point near the town of Alexander, thence in a general southerly direction to the boundary line between the States of Idaho and Utah, together with all intervening tributaries of the Bear River, which are decreed to constitute a single inter-dependent river system, to be administered under the terms of this decree.

2. Subject to the prior rights of the various defendants, as hereinafter decreed in the order of their respective priorities, the said plaintiff, the Utah Power & Light Company, has the right to divert at the Stewart Dam, as hereinbefore described, (and also in seasons of flood water through the "Dingle Inlet Canal" diverting from Bear River in the Northwest quarter of Section 17, Township 14 South, Range 45 East, Boise Meridian) and to impound and store in the Bear Lake Reservoir, consisting of Bear Lake and Mud or North Lake, in Rich County, Utah, and Bear Lake County, Idaho, all of the waters of Bear River to the extent of 5500 cubic feet per second of time, together with the waters naturally flowing into or arising in said lakes, all said waters to be stored in said Reservoir, and to be thereafter released from said reservoir at the said plaintiff's pleasure, through the plaintiff's embankment or "dyke" located within the lake meander lines, and extending from

Section 16 to Section 18, in Township 14 South, Range 44 East, Boise Meridian, by means of control works located therein at a point approximately North 64°15' East 8120 feet from the Southwest corner of Section 18, Township 14 South, Range 44 East, Boise Meridian, and to be thence conveyed through the plaintiff's outlet canal, extending generally northwardly from the said control works to a confluence with Bear River, near the center of Section 6, Township 13 South, Range 44 East, Boise Meridian, and thence down the natural channel of Bear River, for use at various points of diversion now existing, or which may hereafter be established by the plaintiff for the generation of electric power, and for such irrigation or other beneficial purposes, recognized by law, as the plaintiff may devote or dedicate said released stored waters, by use, sale, rental, or otherwise.

In its exercise of the rights herein defined, the plaintiff may, to the extent of its various appropriations, divert and impound in storage, the waters of Bear River and of Bear Lake at all times, and at all seasons of the year, when by so doing it does not interfere with the exercise of any prior rights fixed by this decree, and the waters released by it from storage may be conveyed through the natural channel of the river, and shall be protected under the provisions of this decree for the distribution designated by the plaintiff, as though kept and conveyed within an artificial channel, and the return of the waters to the river, after their various uses by the plaintiff, shall not be deemed an abandonment thereof, but it is recognized by this decree, and it shall be recognized by the officers charged with the administration hereof, that the plaintiff's rights in said waters continue throughout the portion of the stream brought under this decree for use both in Idaho and beyond the Utah-Idaho state line, and all parties to this suit, their heirs, executors, administrators, successors in interest and assigns, and the agents, servants and attorneys of said parties, their heirs, etc., are hereby perpetually enjoined and restrained from in any manner using or interfering with the use by the plaintiff of the said released stored waters, except with the consent and under the authority of the plaintiff, its successors or assigns.

In administering the rights of the plaintiff herein decreed and mentioned, the following considerations shall be observed and recognized:

For the purpose of regulating and controlling the flow of the river, and in the interest of conservation of the waters thereof, the plaintiff may, at any time, divert at its Stewart Dam, and through its Rainbow Canal (and in seasons of flood through the Dingle Inlet Canal) above mentioned, the entire flow of the waters of Bear River, provided it discharges at the same time through its outlet control works, (when there is need therefor to supply the rights of prior appropriators below), and into its outlet canal, and conveys thence to the natural channel of

Bear River, an equivalent amount of water, such quantity to be regarded as natural flow of the river, and not released stored water. In order to compensate for the natural yield of the Bear Lake area, including Bear Lake and Mud Lake, and the area between the lake meander line and Bear River, and mountainous slopes to the west, which area was formerly drained by a natural channel known and designated herein as the "natural outlet," as claimed in the cross bills of certain defendants, the plaintiff shall discharge from its reservoir, through its outlet works, (when required to supply the rights of prior appropriators below) a quantity of water sufficient to yield at a point in the plaintiff's outlet canal, at measuring devices to be installed by the plaintiff as near as practicable to the present bridge on the Montpelier-Ovid road, in the Southwest quarter of Section 7, Township 13 South, Range 44 East, Boise Meridian, the following amounts in addition to any amount of water then being discharged to equal diversions from Bear River, and regarded as "natural flow," to-wit:

- From April 20 to July 1st of each year, 50 cubic feet per second;
- From July 1st to July 15th of each year, 35 cubic feet per second;
- From July 16th to Aug. 1st of each year, 25 cubic feet per second;
- From Aug. 1st to Sept. 15th of each year, 15 cubic feet per second;

such quantity of water to be also regarded and distributed as "natural flow," and not "released stored water," and shall be full compensation for any interruption of natural flow from said Bear Lake area by the plaintiff's reservoir works.

In the delivery to the plaintiff of released stored water at its several power plants, now or hereafter established, or at such points of diversion for irrigation or other beneficial purposes as it may designate for such delivery, transit losses shall be computed as follows:

- 1½% of the net release from storage (after adjustments for natural flow as aforesaid), from the outlet works at dyke to points between Alexander and plaintiff's Grace Dam, situate in the Northeast quarter of Section 1, Township 10 South, Range 40 East, Boise Meridian;
- An additional 1% from said Grace Dam to the headgate of the West Cache Canal Company, situate in the Southeast quarter of Section 25, Township 14 South, Range 39 East, Boise Meridian, and
- An additional 1% from said West Cache headgate to the boundary line between Utah and Idaho.

In determining transit losses, or otherwise calculating the division of waters at the various principal points of diversion, as between natural flow of the river and released stored waters, a time lag of twenty-four hours shall be applied for the flow of released stored waters from the plaintiff's control works to points between Alexander and Grace Dam, and an additional twenty-four hours to points between West Cache headgates and the Utah-Idaho State line, and a proportionate time for intervening points of diversion.

3. In addition to the storage rights of plaintiff, herein decreed, the waters of Bear River and its tributaries between the points hereinbefore described, as drawn within the jurisdiction of this court for distribution under this decree, are hereby allotted and decreed for the various beneficial uses herein specified, without waste, to the plaintiff and defendants, respectively, and their successors in title and interest, in the amounts, for the purposes, and with the priorities, established and prescribed by the "Schedule of Rights" hereinafter defined.

The rights herein decreed and recognized are designated and classified as "Power Rights," "Irrigation Rights" and "Domestic Rights," respectively, and shall have the following characteristics:

"Power Rights" include the right to divert and use water for the generation of electric power, and such rights of diversion and use are continuous throughout the year without limitation to time or season.

"Irrigation Rights" include the right to divert and use water for irrigation, culinary, domestic, and agricultural purposes connected therewith, throughout the irrigation season of each year, which is defined as that portion of each calendar year which commences on the 20th day of April and closes on the 30th day of September; subject to the qualification, however, that between the 20th and 30th days of April of each year, and the 15th and 30th days of September of each year, inclusive of each of said days, no irrigation appropriator shall divert or use more than 40 per cent of his or its allotment under the "Schedule of Rights" hereinafter prescribed, except as is hereinafter specifically provided in the "Schedule of Rights." The water allotted and decreed to the parties hereto for irrigation purposes is, and shall be, appurtenant to the land upon which the same has been applied and used, as described in the schedule; subject, however, to the rights of appropriators or shareholders in any appropriating canal company to change the place of diversion or use as provided by law when no damage or injury results to others, or to make any beneficial use of such waters, or any part thereof, which does not injure other appropriators.

"Domestic Rights" include the right to divert and use water during the non-irrigating season, that is to say, from the first day of October of each year to the 19th day of April following, both dates inclusive, under agricultural appropriations and through irrigation ditches, for general domestic uses, including watering stock and culinary purposes. Each irrigation right herein decreed shall include and imply as a part thereof a domestic right to the use, during the non-irrigating season, of such of the waters allotted for irrigation purposes as are necessary for such domestic purposes and such shall be the measure of said domestic rights, and the extent of use of water through irrigation canals in the non-irrigation season,

until the amount shall be more definitely fixed under the reservation of jurisdiction hereinafter contained. Nothing herein contained shall affect specific allotments made in the schedule of rights under appropriations for domestic, culinary or other specific beneficial purposes, which rights are to be recognized and administered specifically as decreed.

All rights herein decreed to the plaintiff and the several defendants are decreed for the beneficial uses specified, and none of the parties hereto, or their successors in interest, whether heirs, executors, administrators, successors or assigns, shall have the right to divert any of the waters of said Bear River, or any of its tributaries, except for beneficial use, and whenever such use has ceased, such party or parties shall cease to divert, and shall have no right to divert, the said waters, or any part thereof, and each and every of the parties hereto, their servants, attorneys, employes and successors in interest, as aforesaid, are hereby enjoined and restrained from any and all interference with or diversion or use of the said waters, except in the manner, and to the extent, and for the purposes, provided in this decree, whenever such interference, diversion or use would in any manner interfere with the diversion or use of the water awarded by this decree to any of the other parties to this action.

The parties hereto and their successors in interest shall install and maintain suitable and efficient headgates, controlling works and measuring devices at their respective points of diversion, and all water herein allotted and decreed shall be measured at said points of diversion. Said works and devices shall be built and installed in accordance with plans and specifications to be approved by the state official charged with the duty of supervising the distribution of water, (subject to review by this court). All such devices shall be of such design as to accurately register the amount of water diverted, and in the case of ditches diverting fifty or more cubic feet per second, automatic measuring and registering devices shall be installed and maintained. All such headgates, control works and measuring devices and gauges shall at all times be subject to the inspection of either party, and to public officials or water masters having jurisdiction over the distribution and diversion of water, and no dam or other obstruction to the natural flow of the stream shall be maintained so as to divert water from the channel of the stream, except through ditches, canals or other works provided with such headgates, control works and measuring devices, and each of the parties hereto shall be perpetually enjoined from diverting from the channel of the stream or its tributaries any water through any ditch, conduit or other devices not provided with such headgates, control works and measuring device; *provided*, that in case of diversions through pipes for power purposes, measuring devices may be dispensed with where the quantity of water diverted may be otherwise determined by calculations based on power output or current meter measurements.

4. Subject to the power and duty of this court to supervise and enforce the administration of its decree from time to time as occasion may require, and to that end to appoint if necessary its commissioner for that purpose, for which jurisdiction is hereby expressly reserved, the administration of this decree shall be left in the first instance with the officials of the state of Idaho charged with the duty of supervising the distribution of the public waters within said state, the costs and expenses of such administration to be defrayed as provided by the statutes of Idaho. Any party hereto may apply at any time for directions to the watermaster, or for the appointment of a commissioner, if necessary, to enforce any provision of this decree.

The watermaster or commissioner, or other official charged with the distribution of the waters of the Bear River and its tributaries subject to this decree, need not in the first instance, by reason of the decree, undertake the detailed administration of the waters of the entire portion of the river and tributaries placed under the decree, but only of such section of the main river and such tributaries as he shall be specifically directed to administer. Such administration may be extended upon application of any party, from time to time, as the irrigation season advances and necessity therefor arises. Such watermaster, commissioner, or other official, however, shall, after his appointment, have general supervision of the entire river, and of the tributary waters, and if called upon to administer the waters of any particular tributary he may utilize any agency for the distribution of the waters of such tributary locally selected or agreed upon by the water users from such tributary, and if necessary he may appoint assistants to administer any section of the main river, or any tributary thereof, provided always that any party hereto may invoke the powers of such watermaster, commissioner, or other official, to personally direct and supervise the administration of the waters of any section of the river, or of any tributary or tributaries, in strict conformity to the provisions of this decree, both during the irrigation season, and the non-irrigating or winter season, so far as may be necessary to secure to the several parties their rights hereunder, and failing to obtain proper action by such watermaster, commissioner or other official, may apply to the court for directions in the premises.

5. The plaintiff, Utah Power & Light Company, and the defendant, Utah-Idaho Sugar Company, have certain rights to the use of the waters of Bear River with points of diversion in Utah below the Utah-Idaho state line, which rights are included in the schedule of rights herein decreed. The inclusion of said rights in the said schedule is not to be construed as a decree *in rem*, establishing said rights, or as an adjudication of title to said rights, which have attached in a state or district beyond the jurisdiction of this court, but merely as a recognition of said rights to the extent that in the administration of that part of the river within the jurisdiction of this court, and the operation of this decree as hereinbefore defined, the watermaster, com-

missioner or other official charged with the administration of the decree, shall see that there is delivered at the Utah state line such quantity of water as is necessary, together with natural increment below said Utah state line, to satisfy said rights in accordance with their dignity and priority as herein recognized.

II.

(“Schedule of Rights.”)

c.f.s. is used throughout this schedule to designate a flow of one cubic foot of water per second of time.

ac. ft. is used throughout this schedule to designate a quantity of water sufficient to cover an area of one acre to a depth of one foot, or 43,560 cubic feet of water.

MAIN RIVER DIVERSIONS.

1. Utah Power & Light Company—Storage rights.

The plaintiff, Utah Power & Light Company, is entitled to divert from the main channel of Bear River, from the natural flow thereof, for storage purposes, the following amounts:

510. <i>Isaac McKay, H. J. McKay, Ar- well L. McKay, Jedediah Mc- Kay and Mrs. Elmora Steven- son, jointly:</i>	1868—May 1 10 c.f.s. 1885—May 1 10 c.f.s.	the irrigation of 2000 acres in Sections 4, 5, 8, 9, 10, 11, 12, 13, 14, 15 and 16, Town- ship 16 South, Range 38 East, B. M. To be diverted from and returned to the said Weston Creek in the South half of Section 14, Township 16 South, Range 38 East, and to be used for power purposes only, and without obstructing or retarding the continuous flow of said waters to the Weston Creek Irrigation Company during the irrigation season. This appropriation nevertheless is awarded the right to im- pound said water for its power uses dur- ing the non-irrigation season.

Wherever in the foregoing schedule a right is allotted to a corporation as such, which said corporation has forfeited its charter under the statutes of Idaho by failure to file any return or statement, or pay any tax required by law, and such appropriation is represented herein by its directors as statutory trustees, the said allotment shall be deemed to be made to the said directors as trustees, and no right shall be prejudiced by failure or omission to name the said trustees as such, and wherever subsequent to the filing of bill of complaint against the said directors as trustees of any such corporation, the charter of said corporation has been revived in accordance with law, and said corporation has appeared herein and submitted proof of its rights, the said corporation shall be deemed to have been regularly substituted for the said trustees as party hereto.

Provided, however, that notwithstanding this schedule of Rights, users of water under this decree shall at no time divert more water than can be beneficially used, and waste of water is hereby prohibited and enjoined.

III.

1. The following parties to this suit having been duly served with subpoena or warning order, proof of such service having been made, and they having either filed disclaimer or having filed no answer, motion or other appearance or pleading herein, and decree *pro confesso* having been regularly taken against them, and having failed to appear or procure a vacation of said decree, are ADJUDGED AND DECREED to have no right, title, interest or claim in or to any of the waters of Bear River, or its tributaries, and said parties, their agents, servants, attorneys, successors in interest and assigns, are perpetually enjoined from diverting or using any

of the waters of Bear River, or its tributaries, except as they may hereafter initiate or acquire rights to the use of said waters:

Nothing in this decree contained shall be construed to prejudice or otherwise affect the liens of any parties hereto claiming rights as mortgagees or lienholders against any of the water rights or lands to which they are appurtenant, as herein decreed, but said parties shall be bound by the provisions of this decree as determining the priority and amount of water rights to which any of their said liens may attach.

2. The following parties to this action, to-wit: Clifford M. Reed, C. B. Wilson (or Charles B. Wilson), R. N. Egbert, Rosa Martinson, Nathan D. Thatcher, Henry C. Christensen, Frank (or F. A.) Manning, George W. Harrington, Junius F. Phillips and Sam Gillett, having regularly appeared herein by cross bill or other pleading and having failed to submit proof in support of their claims, it is therefore, ORDERED, ADJUDGED and DECREED, That said parties take nothing by their said cross bills, and that they have no right, title, interest or claim in or to any of the waters of Bear River or its tributaries, and said parties, their agents, servants, attorneys, successors in interest and assigns are perpetually enjoined from diverting or using any of the waters of Bear River or its tributaries except as they may hereafter initiate or acquire rights to the use of said waters.

3. It is further ORDERED, ADJUDGED and DECREED, that Elmer W. Smith has no right, title, interest or claim in or to any of the waters of Bear River or its tributaries except as a stockholder of and water user under the Gentile Valley Irrigation Company; that Milton Robbins has right, title, interest or claim in or to any of the said waters except as a stockholder of and water user under the Gentile Valley Irrigation Company and Thatcher Irrigation Company, Limited; that Catherine A. Bevins, David Coombs, Robert N. Egbert, and Boletta Olson have no right, title, interest or claim in or to any of the said waters except as stockholders of and water users under Thatcher Irrigation Company, Limited, and that said parties and each and every one of them and their agents, servants, attorneys, successors in interest and assigns are perpetually enjoined from diverting or using any of the waters of Bear River or its tributaries except as they may hereafter initiate or acquire rights to the use of said water, and except as they may be entitled to the use of water by reason of their interest in the said Gentile Valley Irrigation Company, and the said Thatcher Irrigation Company, Limited.

4. The plaintiff having filed herein its bill of costs for expenses incurred by it for printing bill of complaint, for making service of process, including subpoena *ad respondendum* and warning orders, and of printing this decree, amounting to \$1,923.75, it is ORDERED, ADJUDGED AND DECREED that the same be taxed as costs against the parties to whom rights have been decreed herein *per capita*, at the rate of \$4.81 against each of said parties.

The plaintiff having further included in said bill of costs the amounts paid by it to C. E. Tappan as water master or commissioner of the court in charge of the distribution of water as between the plaintiff and defendant, Last Chance Canal Company, Limited, during the years 1918 and 1919, including therein services rendered by said commissioner for the distribution of water of Soda Creek to the Farmers Land & Irrigation Company during the year 1919, it is ORDERED, ADJUDGED AND DECREED that \$125.00 of said amount be charged to the said Farmers Land & Irrigation Company and \$75.00 to T. H. Horsley, J. E. Lau, D. J. Lau and H. M. Lau, for said last mentioned services, and that one-half of the balance, to-wit: \$1,025.20, be taxed to the Last Chance Canal Company, Limited, and the plaintiff may have process to recover all said costs as herein taxed, in accordance with the rules and practice of the court in equity cases. No other costs or disbursements shall be allowed to any of the parties hereto, but each shall pay his or its own costs.

5. It is further ORDERED AND DECREED that the court retain jurisdiction of this cause for the following purposes:

(a) To make corrections for clerical errors, inadvertences and omissions in the rights decreed.

(b) To review and amend the provisions of this decree, fixing the limits of the irrigation season, and further reducing the amounts of water which may be diverted for irrigation purposes during the months of August and September upon proof of decreased requirements by any appropriator.

(c) To take further evidence upon and to increase or decrease, after hearing allotments for winter use.

(d) To amend the provisions of this decree upon transit losses of stored waters released from the plaintiff's reservoir, and to increase or decrease the allowances herein made for that purpose.

(e) To consider the claims of Thorg Johnson and Enoch Johnson, who claim to divert water from Soda Creek.

All the foregoing reservations of jurisdiction shall extend after the term at which this decree is entered, and during any subsequent term prior to January 1, 1924, at which time, or at such earlier time as the court may determine these matters, this decree shall be closed. In all other respects this decree shall be final.

The court further retains jurisdiction, however, at all times, and from time to time, to make all reasonable rules touching the manner of diverting, measuring and distributing the waters, and the devices to be installed and used for such purposes where it may be impracticable to fully comply with the terms of this decree, and to direct that the parties keep accurate and detailed records of the amounts of water diverted, and to require reports to be filed from time to time of the amount so diverted, and generally to make such orders as may be found reasonably necessary to give effect to the decree, and to appoint commissioners or water masters to make distribution in accordance with its terms, and to punish the parties hereto, their officers, agents and employes, and their grantees and successors in interest, for any violation of the provisions thereof.

Done in open court this 14th day of July, 1920.
